

Saint Rose of Lima Academy

Respect, Love, and Education Through Christ

The sixth grade social studies class recently completed a unit of study on Ancient Egypt and Egyptian Civilization. Learning about the past enables our students to better understand the present and will encourage them to prepare for the future.

The students were enthusiastic learners who discovered the scientific and mathematical contributions to Egyptian Society. They especially enjoyed learning about the many artifacts that had been

found by archeologists. Artifacts helped reveal to us the wonders of early Egyptian life. The class constructed their own artifacts and gave oral

presentations.

They also played a game called "The Mummy," where teams had to construct a mummy using toilet paper, and then race their mummy, in record time, to a finish line. It was an exciting end to a great course of study.
