

# Saint Rose of Lima Academy

*Respect, Love, and Education Through Christ*

Teachers and students at St. Rose have been enjoying the latest technology with the addition of **Smart Boards** for all Kindergarten through grade eight classrooms, enabling teachers to present more interactive and enjoyable lessons for the students.

The academy has also added new textbook series for kindergarten to grade 8 in Religion, Math and Social Studies, through which the teachers may access activities online to further enrich their students.

The third grade gets interactive with Smart board technology as they identify place value and demonstrate knowledge of ordinal numbers in math class. Students will use Smart board technology in all subject areas to experiment with different activities and topics throughout the year.
